

# HARMEET KAUR

## EDUCATION

Bachelor of Technology (B.Tech),  
Guru Gobind Singh Indraprastha  
University | 2011 – 2015

Seasoned Front-End Engineering Leader with 10+ years of experience building high-performance, scalable web applications. Proven success in leading frontend architecture, mentoring teams, and delivering maintainable codebases. Strong advocate for performance, developer experience, and customer-focused design.

## SKILLS

React Testing Library  
React  
TypeScript  
JavaScript

## EXPERIENCE

- Zalando SE, Berlin, Germany
  - **Engineering Lead** | May 2025 – Present
    - Led a team of engineers across multiple product lines.
    - Set and maintained team goals and performance benchmarks.
    - Collaborated with stakeholders to align technical execution with business strategy.
    - Mentored junior engineers on design patterns and code quality.
  - **Senior Software Engineer** | Jan 2023 – May 2025
    - Owned the frontend architecture of key applications and was responsible for full delivery.
    - Implemented performance optimizations and observability practices.
    - Championed CI/CD pipeline improvements and monitoring integration (Sentry, Grafana).
- Paytm (One97 Communications) Pvt. Ltd., New Delhi, India
  - **Senior Software Engineer** | Sep 2020 – Jan 2023
    - Led the development of core merchant and UMP applications.
    - Refactored legacy code to improve maintainability and architecture.
    - Improved CI/CD pipeline efficiency through automation and Sonar integration.
    - Enhanced application performance and user experience by optimising frontend delivery.
- Development Bank of India, New Delhi, India
  - **Development Engineer** | Jun 2018 – Sep 2020
    - Built reusable UI components for financial analytics and approvals.
    - Developed cost analysis and reporting management tools.
    - Led UI efforts on projects involving complex backend integrations.
- Infosys, Hyderabad, India
  - **Systems Engineer** | 2015 – 2018
    - Built UI components and supported client requirements.
    - Created monitoring portals and automated error reporting flows.
    - Supported internal operations and improved deployment flows.
